Impact*

Why do you believe your team will find a solution that can be successful on the market? To what level will your solution be innovative in regards to the existing solutions on the market (incremental improvement, radical improvement, breakthrough innovation...)? You may also describe what you already found out about the companies' competition and how you are trying to get to a differentiated solution. Do you already have ideas about how a solution to this challenge might not only solve the challenge but tackle a respective structural problem? How important will the project in your opinion be for the company? Will the solution be implementable also in other sectors?
